RS- Data Architect solutions LLC

RS DATA ARCHITECT SOLUTIONS LLC.

With our software we are providing an affordable, secure, and reliable platform for pickup, online ordering, and delivery

RESTAURANT ADVANTAGES

With RS data online services, we provide easy to use Administrative tools including an admin module page as a part of the site for restaurant users. As a result any changes by the owner including all product information, promotions, store hours, online orders and more can be immediately updated onto the site. Additionally, all customer orders and information will be recorded and faxed to never lose track of orders and all online orders from costumers will always be approved via confirmation email to outing customers. Along with this, if an order is cancelled we revise the transaction 100% back to the customer.

RESTAURANT PRICES

Negotiations and extended changes to a website overtime are always open for discussion. Additionally there are \$0 down plans if you qualify

- No Contracts
- No Monthly Maintenance Fee
- No Initial Cost to setup the site
- No Secure SSL Fees or PCI Compliance Fee to bring up your secure site
- Just 5% of each order will be automatically deducted towards our service whenever the order is placed
